### Be a part of the 3 Billion Dollar Teeth Whitening Industry

## Join the Spalight Team!

**Simple Service to Add.** Needing minimal training, no special expertise, and only the space necessary for a chair and our maneuverable SpaLight LED Stand. SpaLight can be implemented in your spa easier than virtually any other service.

A breakthrough in the Blue-Light Techonology, and our FDA & MSDS approved proprietary whitening gel is a profitable addition to your business.

**Brighter Smile First Visit.** The SpaLight whitening accelerator's high intensity LED cold-light activates SPALIGHT whitening "gel", a specially formulated gel with 22%-35% Carbamide Peroxide and 20 nanometer silicon dioxide (SiD2). The 15 minute SpaLight procedure activates our formula to get simply pure, simply SpaLight results.

**Industry's Finest Technology.** By using the latest filtration techniques, SpaLight operates at a lower temperature than similar products, thus avoiding excessive irritation of the nerves in the teeth. SPALIGHT SYSTEM is very effective for teeth that have been stained by smoking or stained causing food and drinks, such as coffee and tea.

#### Quality Your Spa Can Trust. Safe & Effective

SpaLight is a revolutionary technology that is clinically proven to get your client's teeth their whitest.

- Produces cold-light wavelengths of 470-520 nanometers.
- Special SpaLight LED light is filtered over 12,000 fibers, through an optical lens coated with more than 30 protective layers. The process removes harmful heat and UV rays.
- In 15 minutes, SpaLight treatment lightens the pigmentation of 16 or more teeth through the dentin layer, restoring whiter teeth.

We offer three special packages to fit your salon. Earn up to \$18K with your initial SpaLight package.
